

## Feedback for RRMP Research Proposal Presentation Summative

Tutor completing summative feedback: Karen Outram	Student number: 286180 [Ying Chan]
Details of any extensions etc:	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments
Knowledge and Understanding weighted 25%, Use of relevant sources weighted at 5%	Satisfactory	To note that you have moved your topic on from the Literature Review which is appropriate regarding the Research Proposal Presentation. There is some very good intrinsic knowledge of your subject demonstrated in the presentation, that reflects the current problems and viable solutions regarding your topic chosen. However, there should have been much more theoretical underpinning, to reflect the intrinsic knowledge demonstrated in the presentation. There needs to be this balance in summative moving forward and so the outcome here is satisfactory overall.
Criticality weighted at 25%, Use of relevant sources weighted at 5%	Satisfactory	It is good practice to add your full reference list to your transcript as well as your power point, so please do bear this in mind for future summative. There are limited theoretical resources in evidence and as discussed in 'knowledge/topics' these should have been much more extensive. Professional knowledge is valuable but in academic study that knowledge does need to be fully underpinned by theory.
	Satisfactory	Whilst the concepts discussed were viable, there wasn't enough debate and discussion looking at both theory and practice. There does need to be that balance of theory and real-world applicability for future summative.
Structure and Presentation (10%)	Very Good	The structure and presentation of the power point is well considered and balanced. There are effective visuals used to underpin your discussion. Some of your slides had a little too much text applied and so you could minimise this for future presentations as the text is a prompt for discussion. Good use of colour in the power point presentation also.
Presentation and Communication Skills (30%)	Very Good	There is a transcript to support the presentation itself. The presentation comes within the 15-minutes allocated for the summative and this is good practice. The presentation is well-paced and benefits from sub-titles applied to the content, which shows planning and careful consideration regarding effective communication from tutor to student.
Overall		
Positives:		

- Very good intrinsic knowledge of the subject
- Very good structure and presentation regarding the power point
- With a satisfactory grade overall

**Points for development:**

- Extensive theoretical underpinning is really important for any academic summative and so do work on this point as this will likely help improve your summative grade for future
- Use less text on your power point slides. You took the time to add sub-titles to your presentation; that with the support of a transcript and your audio itself is enough to convey your content. Minimise your slide text, as that text is there just to prompt what you intend to say in your audio
- Get a balance between professional knowledge and theory moving forward
