

Feedback for RRMP Literature Review [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Ying Chan
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

For your summative ensure that your list of references are fully alphabetically ordered and pay attention to Harvard Referencing formats.

The structure and intent of your formative looks logical, when it comes to completing your actual summative, ensure that the discussion remains focused and that not too many research tangents are pulled through the content. You have limited word count for the Literature Review summative and so keep the discussion focused at all times.

There is a basic outline of your intent in your document. It is acknowledged at formative stage that discussion does not need to be academically structured, but when completing your actual summative ensure that the assignment is fully academic in context. Critically evaluate the pros and cons of your research so that you develop appropriate debate in the assignment.

Remember that regular citation has to occur, so that where research or a fact is stated you need to cite.

Wishing you the best of luck now for your actual summative,

With best wishes

Karen
